

EDUCATE 360 AND TCM SECURITY INTRODUCE

Penetration Testing Services

At Educate 360, we're excited to expand our comprehensive cybersecurity offerings to include penetration testing services powered by TCM Security, a globally recognized leader in cybersecurity certifications, education & consulting.

Why is Penetration Testing Critical for Your Business?

Cyber threats are not a matter of if but when. Attackers are actively targeting businesses of all sizes, exploiting overlooked vulnerabilities before they are even discovered internally. In a world where speed-to-market is crucial, security risks can quickly accumulate - whether it's cloud misconfigurations, outdated dependencies, or overlooked compliance requirements. A penetration test is more than just a vulnerability assessment; it's a strategic tool that helps your organization identify security gaps, improve resilience, and build trust with customers.

Did you know?

Companies that store, process, or transmit cardholder data—or have systems connected to the Cardholder Data Environment (CDE)—may be required to conduct annual penetration testing.

Every minute without a proper security assessment increases the window of opportunity for attackers to compromise your systems. **80% of breaches occur due to known vulnerabilities that organizations failed to address.**

A penetration test can identify and prioritize these risks before attackers do, ensuring your business operates within industry regulations and stays secure.

How Does TCM Security Conduct Pentests?

100% US-Based Experts

Our pentesters are full-time employees based in the United States.

Dedicated Attention

Each pentester focuses on only one engagement at a time, ensuring undivided attention.

Certified Professionals

Credentialed pentesters with detailed bios, backed by SOC 2 compliance.

What's Included in a TCM Security Pentest?

All of our pentesting services include the following:

- ✓ **Detailed Technical Report**

- ✓ **CSV of Findings**

- ✓ **Executive Summary**

- ✓ **Open Slack Channel**

Open line of communication with the TCM Security Team that any of your team members can join to participate, observe, and learn while a pentest is being conducted.

- ✓ **Debrief Meeting (Optional)**

A walkthrough of all findings, address questions, and clarify remediation recommendations.

- ✓ **90-Day Remediation Period**

Includes a free retesting and final report highlighting updates (not included with/on social engineering or physical pentests).

Our primary areas of focus:

- External & Internal (Black / White / Gray box)
- Wireless Testing
- Social Engineering (Phishing / Vishing / Smishing)
- Vulnerability Scanning (Monthly / Quarterly / Annual)
- GRC (Risk Assessments, Policy Review, vCISO Web, Mobile, & API Testing)
- Physical (Pentest + Educational Walkthrough)
- Cloud Audits + Pentesting
- Red & Purple Teaming

Who is TCM Security?

TCM Security has earned a stellar reputation as a trusted name in the cybersecurity industry, providing education and consulting services to professionals worldwide. With a strong focus on offensive security, ethical hacking, OSINT, programming, and more,

TCM Security empowers cybersecurity professionals with the knowledge and skills needed for success. Their real-world consulting services specialize in penetration testing, with many of their testers also serving as course developers and certification creators, ensuring an exceptional level of expertise backed by hands-on experience.

Why Choose Educate 360 and TCM Security?

Educate 360, together with TCM Security, is uniquely positioned to help organizations strengthen their defenses with targeted penetration testing services. Here's why:

Deep Expertise and Practical Application

TCM Security's team of penetration testers brings unparalleled knowledge, honed through the development of certifications and courses trusted by cybersecurity professionals worldwide.

Real-World Results

With a consulting practice rooted in education, TCM Security delivers practical, actionable insights that help businesses uncover vulnerabilities and mitigate risks.

Holistic Cybersecurity Solutions

Educate 360's extensive instructor-led training offerings combined with TCM Security's penetration testing services provide a comprehensive approach to protecting your organization from emerging threats.

Strengthen Your Cybersecurity

With this expanded service offering, Educate 360 is proud to help organizations take a proactive approach to cybersecurity by identifying vulnerabilities, fortifying defenses, and empowering teams with the expertise needed to stay ahead of evolving threats.

Cyber threats don't wait, speak to a member of our team today to find out how Educate 360 and TCM Security services can strengthen your organizations defenses.
